

# Surfa 1 Focaline Optical Lenses

Focus the Light or Graze a Wall

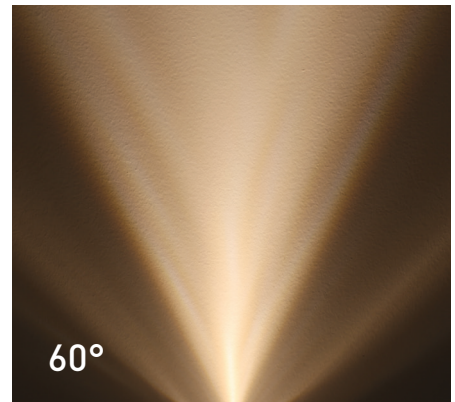

Optical lenses offer focused light and wall grazing capabilities for Surfa 1 surface-mount channels. Available in 4- and 8-foot lengths, the Focaline optical lens brings out wall textures with a smooth line of light, without the hotspots caused by pinpoint lighting. Focaline optical lenses enhance the dramatic effect of wall textures with clean, high-contrast lighting.

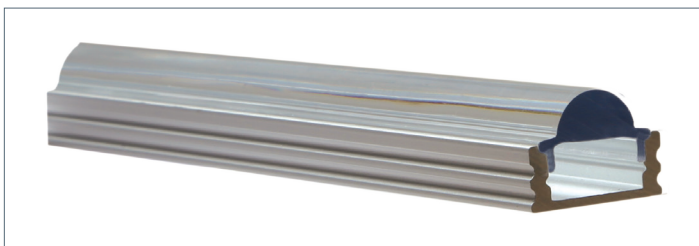

30° optical lens shown with PrimaLine 5.5 LP Tape Light

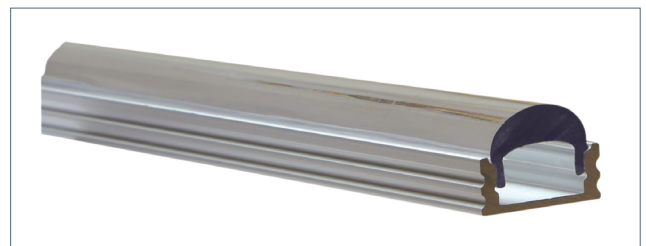

For extended throw applications

For a broader flood effect

30° optical lens shown in Surfa 1 channel (sold separately)

60° optical lens
