LED Lighting Facts - A Program of the U. S. Department of Energy

The LED Lighting Facts® is a program of the U.S. Department of Energy that showcases LED products for general illumination from manufacturers who commit to testing products and reporting performance results according to industry standards.

Solid-State Lighting - Energy.Gov

Solid-state lighting (SSL) technology has the potential to reduce U.S. lighting energy usage by nearly one half and contribute significantly to our nation's climate change solutions. The U.S. Department of Energy acts as a catalyst to drive R&D breakthroughs in efficiency and performance, and to equip buyers to successfully apply SSL lighting.

U. S. Department of Energy

The U.S. DOE Energy Efficiency and Renewable Energy Web site provides information on energy efficiency and renewable energy technologies.

Find Specific Energy Information for Your Town or City

The mission of the Energy Department is to ensure America's security and prosperity by addressing its energy, environmental and nuclear challenges through transformative science and technology solutions.

Design Lights Consortium

The DLC — a collaboration of utility companies and regional energy efficiency organizations - is committed to raising awareness of the benefits of efficient lighting in commercial buildings.

Michigan Solid-State Lighting Association

The MSSLA was formed in 2009 in response to the growing opportunity for next generation lighting companies in the State of Michigan to have a positive impact on the local economy and the global environment.

Solid State Lighting & Energy Electronics Center

The Solid State Lighting & Display Center (SSLDC) is focused on advancing new semiconductor-based energy efficient lighting and display technologies through partnerships with key industry leaders.

Architectural SSL Magazine

The only magazine solely dedicated to the advancements in solid-state lighting in the built environment. Leading LED and solid state lighting into the built environment. Recognizing champions of LED technology today and tomorrow. Informing a design and construction industry with a "need to know" perspective.

ComEd – Powering Lives (An Exelon Company)

At ComEd, our commitment to improving the environment involves continually assessing everything we do and looking for ways to be more efficient and more effective. Adding momentum to our mission, many of our efforts to be more environmentally conscious have been recognized by other organizations.

Electronics Weekly

The latest electronics industry news, jobs and products from ElectronicsWeekly.com covering design electronics and electronic components.

Green Tech Media (GTM) - Green Technology and Cleantech Movement

Leading source of news/research on green technology and the cleantech movement. Analysis and networking events on clean and renewable energy.
