

Radialux® 4.7 LP (Low-Profile) RGB-W LED Tape Light

Radialux 4.7 LP uses low-profile diodes in a tight array to ensure a smooth, hotspot-free line of light. Use this tape light in selected models of Alloy LED’s mounting channels with diffuser—like Surfa 7 surface-mount and Ankr 4 Mud-In—for a perfectly blended line of color-changing LED light. RGB-W tape light can be adjusted with a color controller to provide both saturated and pastel colors.

- Perfect brightness for medium-sized applications, retail, and hospitality spaces
- Mix of white and RGB diodes offers both pastel and saturated color possibilities
- Choose warm, neutral, or cool white with select controllers
