

ThruLine™ Slim Premium Diffusion LED Fixture

The ThruLine Slim Premium Diffusion LED Fixture is the narrow, space-saving model of Alloy's line of direct connect 120V LED fixtures. This Energy Star rated LED fixture has a premium diffusion lens for hotspot-free light, and connects directly to AC house power, with no need for an external power supply, so installation is quick and easy. The ThruLine Slim's bright, warm light can be dimmed with an incandescent dimmer switch and provides hotspot-free lighting, even when reflected on glossy surfaces. It even includes adjustable mounting brackets so you can direct the light just where you want it.
