A DIALOGUE ABOUT AMBIENCE.

LED light in furniture and furnishings. The effective extension of room light.

Light is a fundamental part of life. One that noticeably affects our well-being. The bright, cool white morning light is very different from the warm glow of candles or light bulbs. Inside, one tries to mimic daylight in an effort to design the room with it. Light in furniture and furnishings blends harmoniously with the lighting of the room adding another layer to the design—a fourth dimension. This way, subtle nuances in the ambience are created and specific areas are separated or accentuated to create a perfectly composed, holistic effect.

Due to their low heat output, relatively small fixture size and long service life, LED lights are ideally suited for this purpose. Light colors, even differently tempered whites, are recreated realistically. With the Loox LED system work areas, presentation areas and living rooms can be illuminated for functional and decorative purposes. Well-being can be influenced in a targeted manner. And it's surprisingly simple.

Light—Engineered by Häfele

Häfele combines knowledge of the essence of light with innovation and global engineering expertise to create the highest quality, easiest to use, LED lighting system available.

A SYSTEM THAT SIMPLIFIES DESIGNING.

Loox. Light ideas that are flexible, easy and reliable.

With the Loox LED system it's easy to develop and plan flexible light ideas. The flexibility is a result of a wide selection of different components ranging from light fixtures to switches. The easy-to-use plug-in system with its clearly marked color coding connects all the elements with a compact driver. Large systems with multiple or different drivers can also be created. All components are globally certified and provide long-term reliability and peace of mind during operation.

FLEXIBLE
EASY
RELIABLE

PLAN FLEXIBLY.

Loox. The comprehensive kit of light and functions.

With Häfele Loox LED lighting the possibilities are endless. The large number of components in the system allows for a multitude of lighting effects coupled with a variety of installation options. Whether you want integrated lighting in a drawer or cabinet or a combination of mood and functional lighting in the kitchen, Loox gives you the look you've been searching for with long-lasting reliability.

RECESS MOUNTED LIGHTS AND SURFACE MOUNTED DOWNLIGHTS.

SWITCHES.

On/off switches, dimmers, motion detectors, sensor switches and remote controls

FLEXIBLE LIGHTS.

LED STRIP LIGHTS.

SURFACE MOUNTED LIGHTS, GLASS EDGE LIGHTING, ALUMINIUM PROFILES, PLINTH LIGHTS AND MORE.

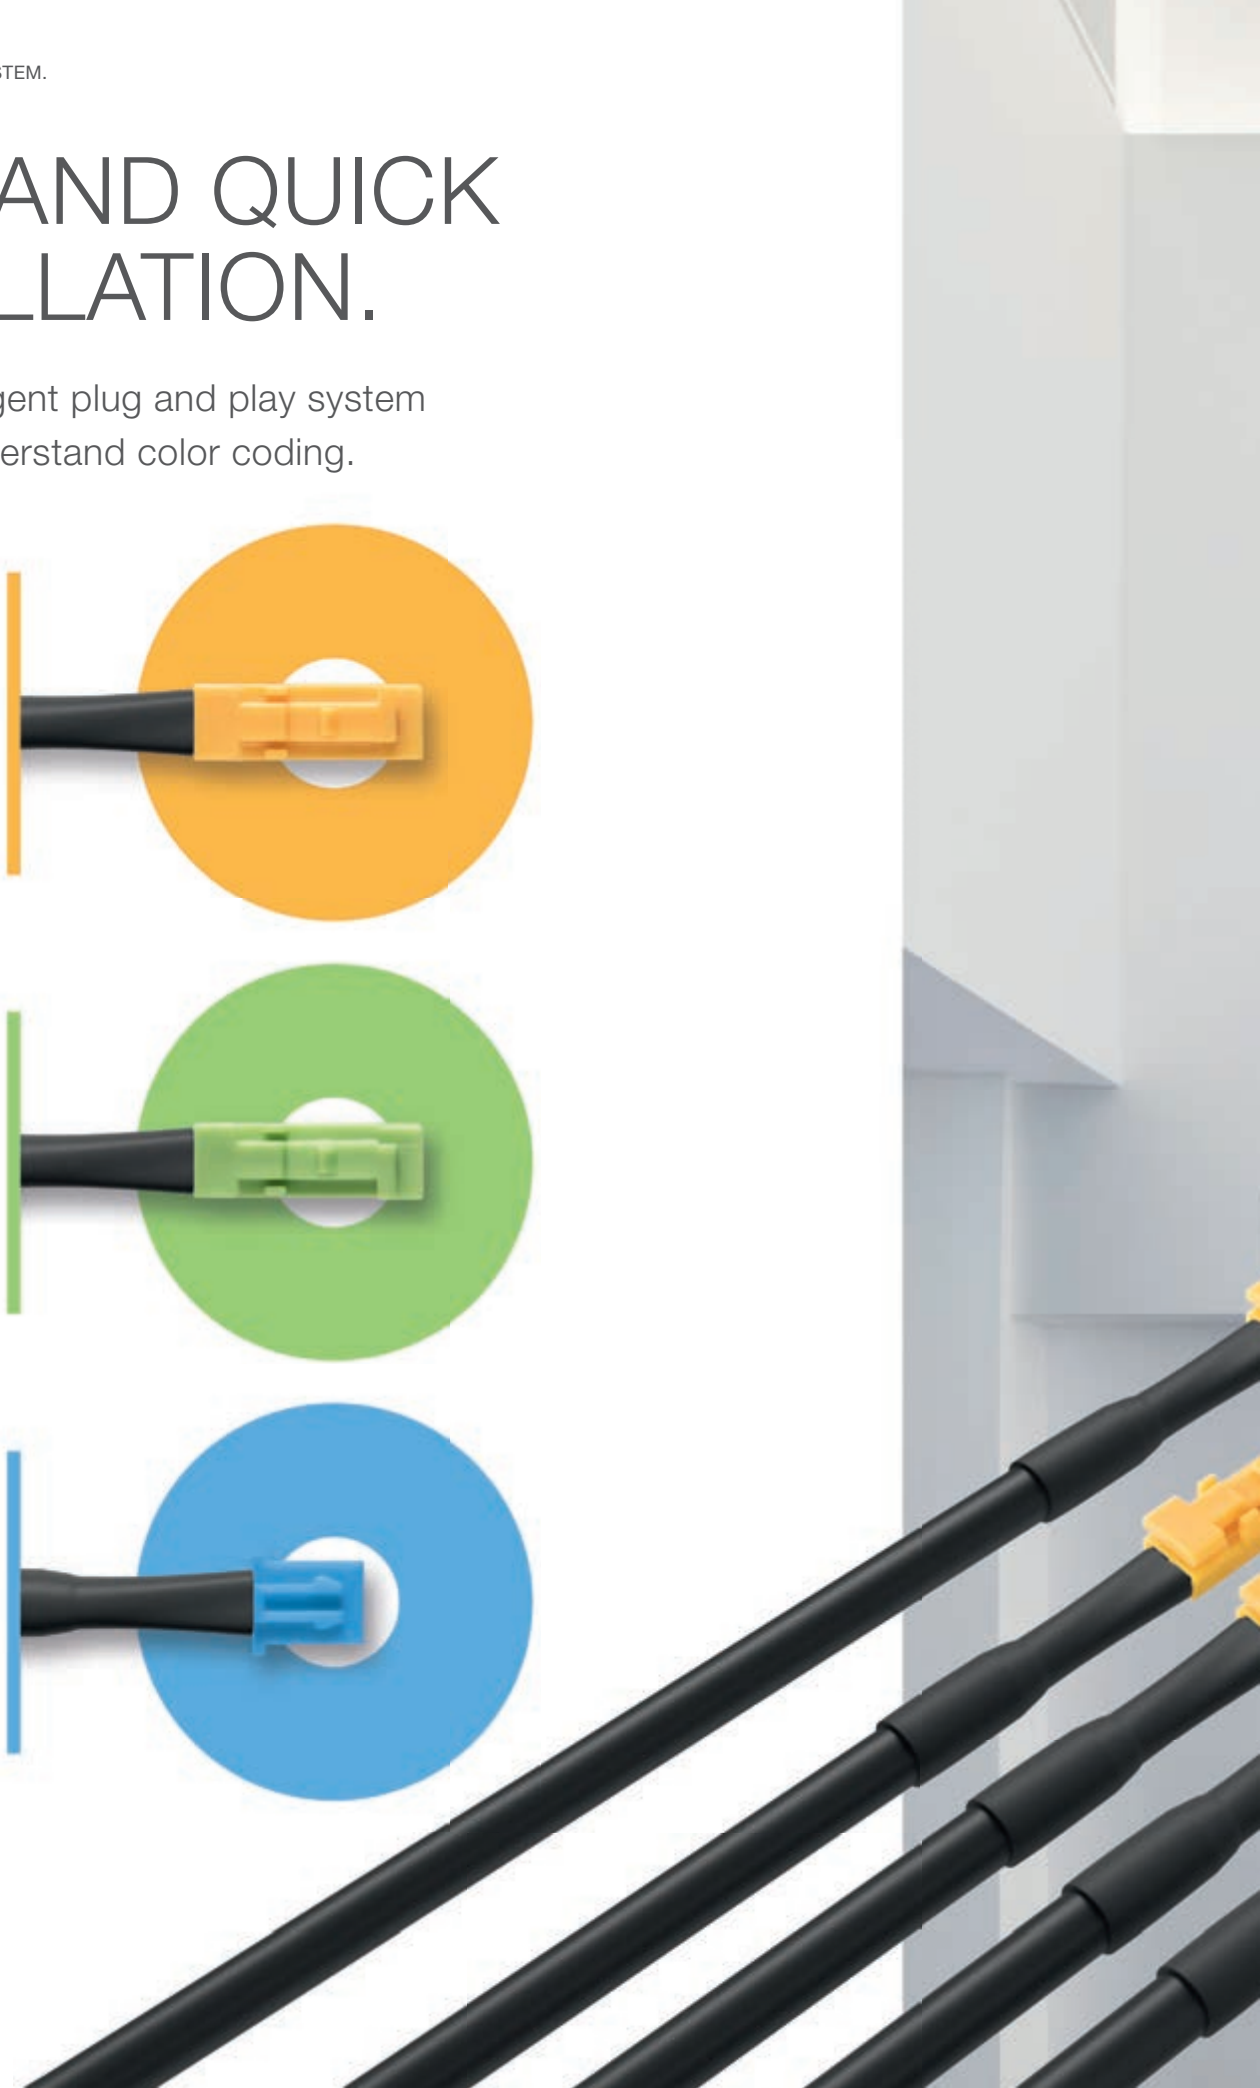
EASY AND QUICK INSTALLATION.

Loox. The intelligent plug and play system with easy to understand color coding.

12 V

24 V

350 mA



PLUG AND PLAY.

Loox has three power systems for different LED lighting with matching drivers. 12V and 24V (parallel connection) for universal applications range from ambient to functional lighting with different outputs. 350mA (series connection) is for spot lighting with low wattage.

Clear color coding of the plugs with individual design makes the system easy to assemble and install.

COLOR CONSISTENCY – AFTER-MARKET RELIABILITY
OPTIMUM COLOR RENDERING INDEX
ALL COMPONENTS ARE HIGHLY RELIABLE

ENSURING CUSTOMER SATISFACTION.

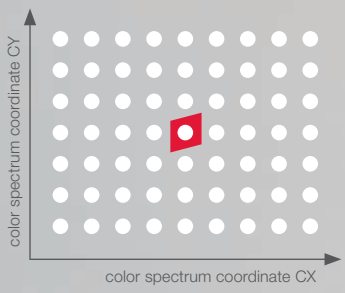
Loox. Consistently high-quality with certified Häfele standards.

Consistent color quality and performance.

An important factor for new technologies is reliability in use. Häfele has set high standards for the selection of materials which are continually tested and certified internationally. Setting a narrow binning standard is one of them. LEDs are tested and sorted for color, luminous flux and forward voltage after production.

Häfele selects only the highest quality LEDs for maximum durability, energy efficiency and to ensure aftermarket reliability. Häfele has an extensive list of quality criteria in order to ensure reliable products and long-term customer satisfaction.

Häfele Binning



Close selection criteria ensure quality.

TO SEE, OBSERVE OR WATCH?

Designing with light functions.

In the 1950s, Richard Kelly, a pioneer of lighting design, differentiated between light to see—ambient luminescence, focal glow—the illumination of an object or area and play of brilliants—in which the light itself is the object to observe.

Emphasizing room dimensions.

The Loox LED system also makes other, more specific, functions to use light as a design element in casework and cabinetry possible. Task lighting works to illuminate a work area in a kitchen or bathroom countertop. Ambient lighting balances room dimensions and facilitates spatial orientation. The narrow beam of spot lighting is used to highlight interesting objects or features.

The versatility of applications and combinations of lights within the Loox LED system create the opportunity to emphasize the dimensions of rooms and lend an ambience to casework and cabinetry that provides a holistic connection with the room.

SPOTLIGHT

INVIGORATING OR RELAXING.

Designing with color temperature.

Light with a high blue component has an invigorating effect on the body. Just like the cool fresh light of an early morning. By comparison, strong red- and yellow-colored light has a relaxing effect and evokes a state of rest. Just like the warm glow in the late afternoon or in candlelight.

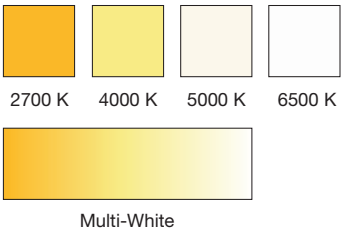
Knowledge creates opportunities.

The color of the light, also referred to as color temperature (measured in K = Kelvin), controls our state of well-being. Using Loox LED lights can deploy this effect in a targeted manner. Available in color temperatures ranging from 2700-6500 K, cool white light is ideal for task lighting while ambient lighting for settings should be a warm white light.

The use of multi-white lights integrates open kitchens into the living environment. In the morning, bright and invigorating cool light illuminates the work surface; in the afternoon the light is warmer and in the evening it is dimmed to a warm white for a relaxing ambience. The transition is seamless and remote controlled.

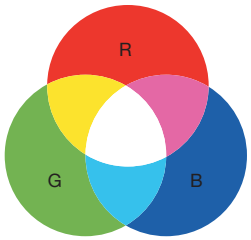
RGB lights can be supplemented to add intense light colors for individually adjustable, decorative effects.

Color temperature



Loox LED lights are available in a wide selection of warm and cool temperatures ranging from 2700-6500 K.

Color mixing



Loox RGB and multi-white lights provide added versatility to room lighting designs. Select, and change, light color and intensity at the touch of a button.

RGB

MULTI-WHITE LIGHT

TARGETED CONTROL OF LIGHT EFFECTS.

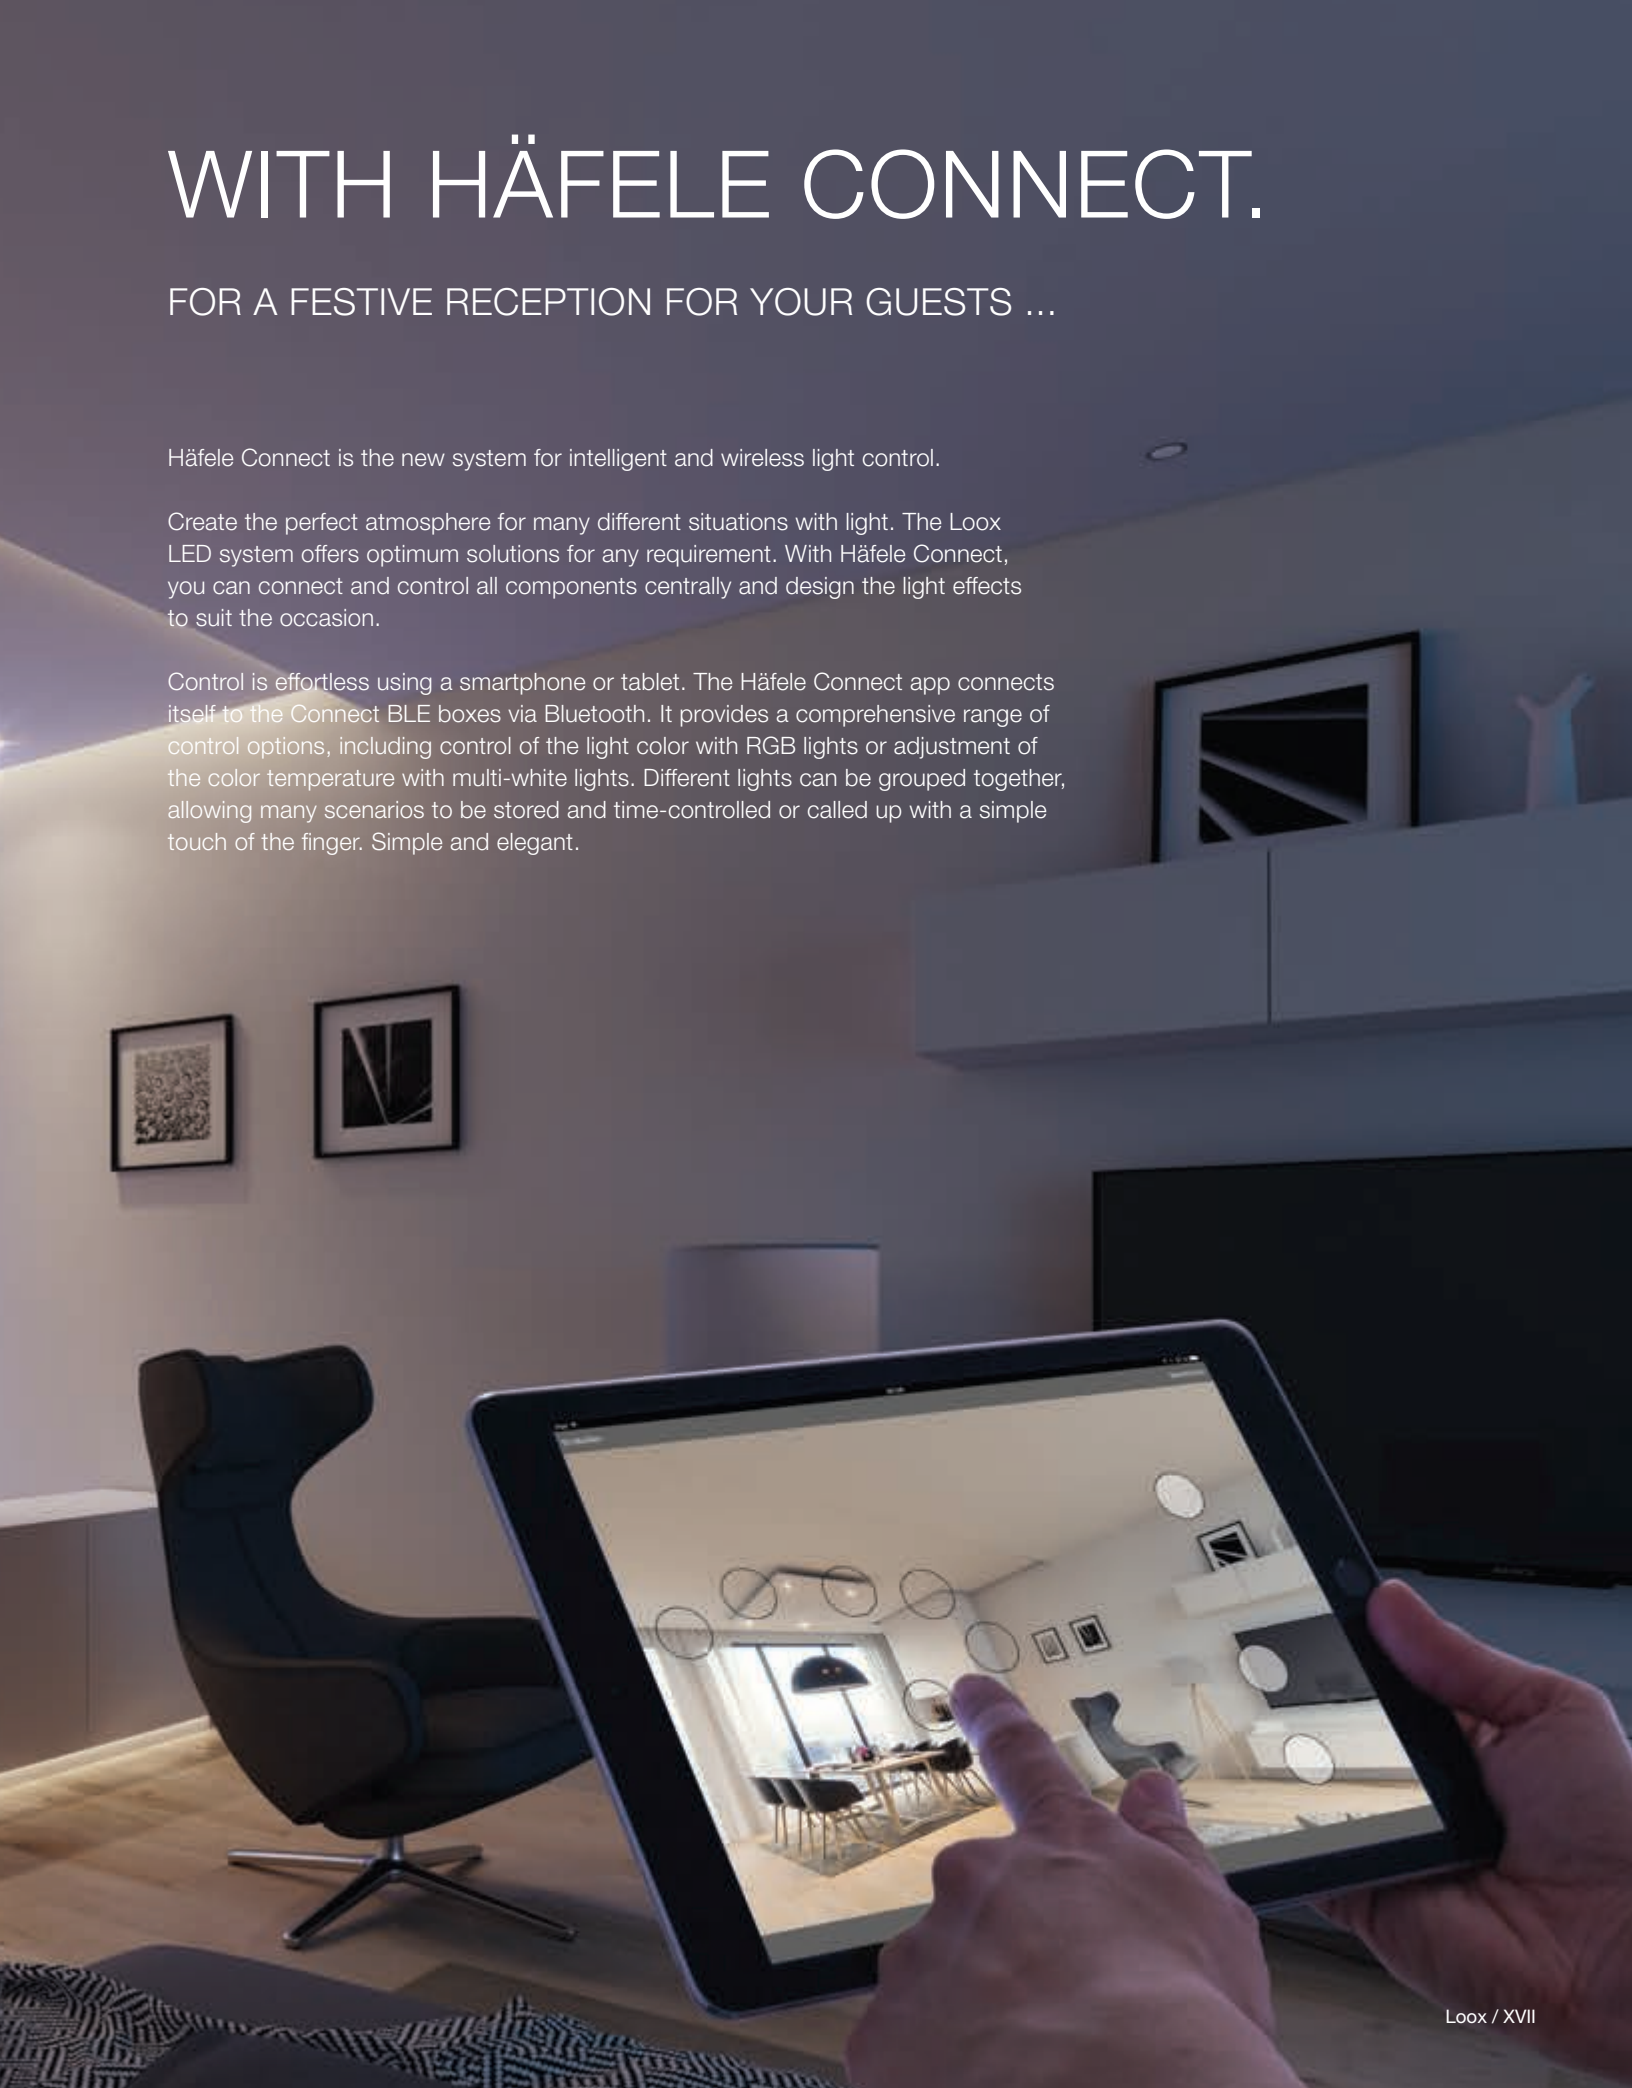
WITH HÄFELE CONNECT.

FOR A FESTIVE RECEPTION FOR YOUR GUESTS ...

Häfele Connect is the new system for intelligent and wireless light control.

Create the perfect atmosphere for many different situations with light. The Loox LED system offers optimum solutions for any requirement. With Häfele Connect, you can connect and control all components centrally and design the light effects to suit the occasion.

Control is effortless using a smartphone or tablet. The Häfele Connect app connects itself to the Connect BLE boxes via Bluetooth. It provides a comprehensive range of control options, including control of the light color with RGB lights or adjustment of the color temperature with multi-white lights. Different lights can be grouped together, allowing many scenarios to be stored and time-controlled or called up with a simple touch of the finger. Simple and elegant.



Loox / XVII

… OR A RELAXED EVENING TOGETHER.

Wireless control of different scenarios is incredibly easy with Häfele Connect. The BLE boxes interconnect via Bluetooth and are intuitively controlled using a smartphone or tablet. Different light sources can be grouped together and stored as scenes. Electric fittings can also be actuated and incorporated in scenarios. Thanks to plug and play functionality, the system can also be easily added to existing installations at any time.

MODULARITY

A BLE box has up to four output channels and is powered by a 12 V or 24 V driver via two leads. The Häfele Connect BLE box uses Bluetooth to communicate with a smartphone or tablet. The following situations can be intuitively and easily controlled with the Häfele Connect app:

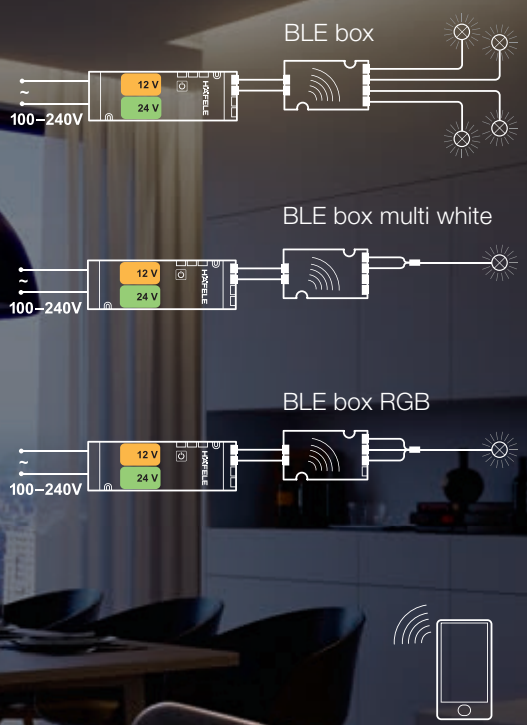
Switching on/off and dimming lights.

Switching on/off and dimming multi-white lights and adjusting the color temperature.

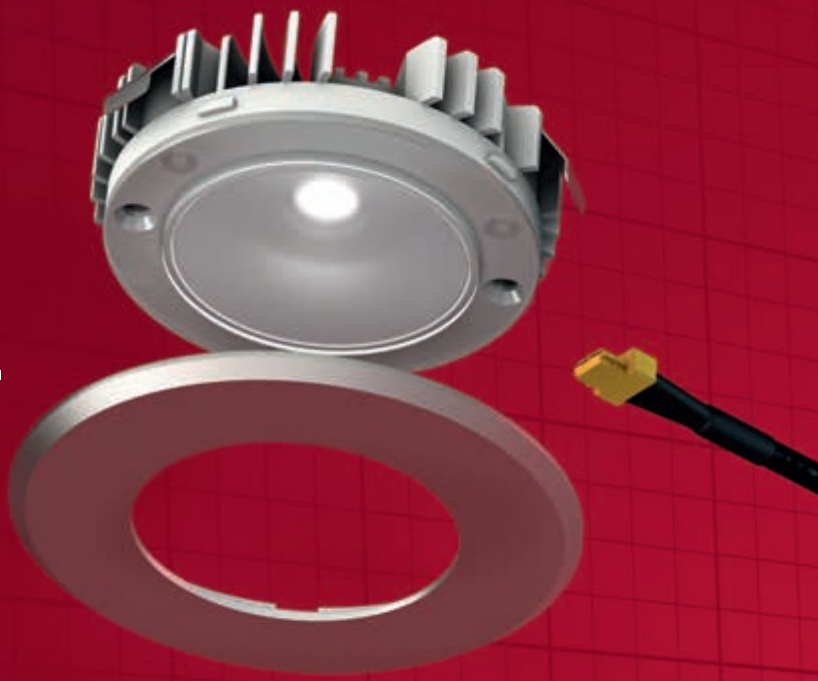
Switching on/off and dimming RGB lights and adjusting the light color.

Pre-setting individual light scenarios for different occasions.

Switching sound systems on and off.



Loox / XIX



MANY OPTIONS. LOW COST.

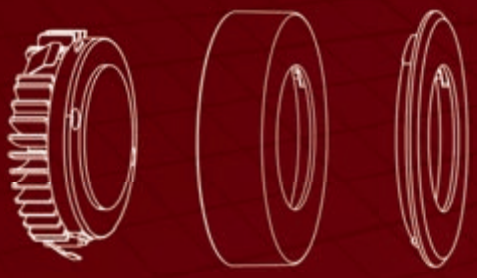
Loox. The LED lighting system.
Engineered by Häfele.

The intelligent drivers represent the core of the Loox system. Not only do they provide different numbers of lights with the power that's required, but they're also suitable for the different voltages and frequencies all over the world, recognize different types of switches, can be used for dimming and can be combined in many different ways.

12 V 24 V 350 mA

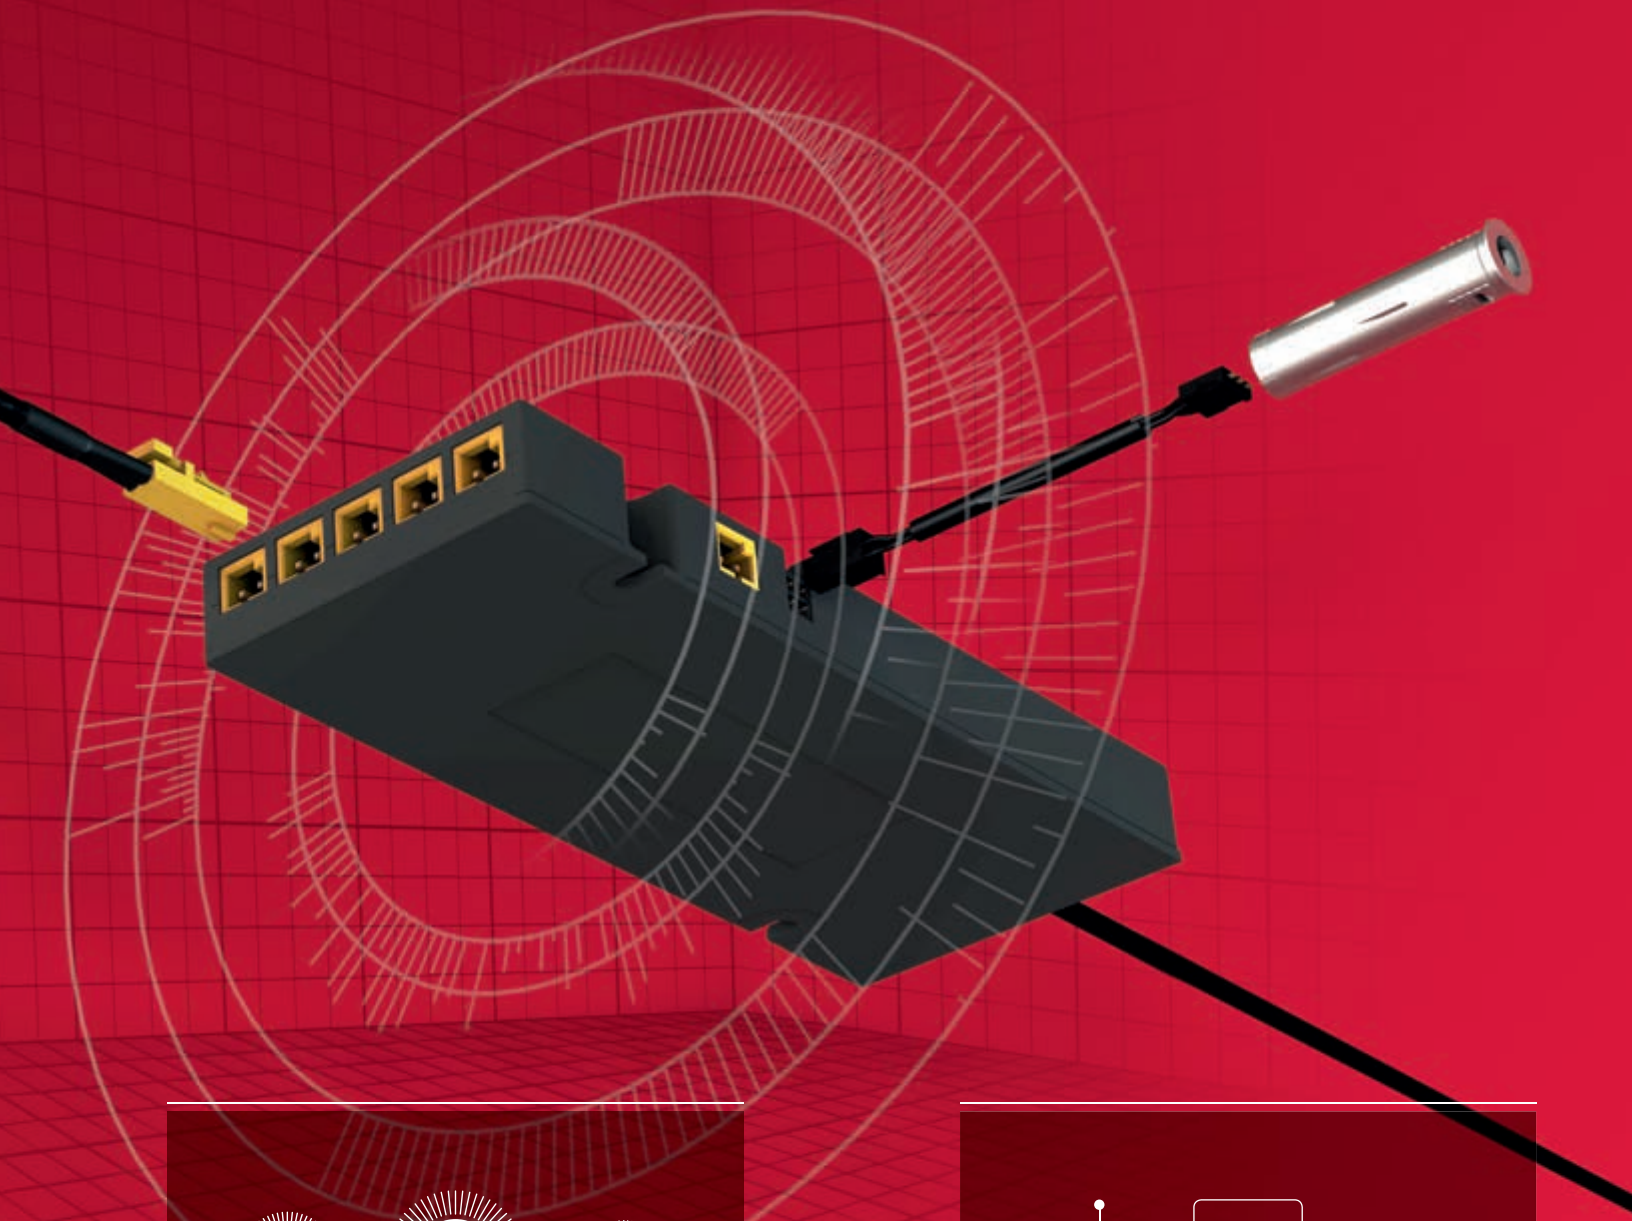
SYSTEM

Coordinated components turn Loox into an atmospheric LED system for almost any application. From simple to complex, Häfele's plug and play is flexible, easy-to-install and always reliable.



MODULARITY

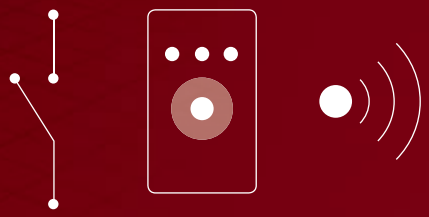
The lights and switches are cabled to connect to the driver at both sides. This means that a switch can be replaced with a dimmer at a later date without having to install new cable. Cover options give recess mounted lights and surface mounted downlights a different look.



12 V 24 V 350 mA

LIGHT INTENSITY

12 V system: Primarily used for ambient and mood light. 24 V system: Primarily used for functional light because of the higher light intensity. 350 mA system: Primarily used as a spotlight because of the high light intensity.



CONTROL

Switch and control—suitable for any environment. With different cable-connected switches, adjustable remote controllers and radio switches completely independent of the location, new freedom in casework and cabinetry design.

LED RGB COLOR MIXING

COLOR MIXER, WITH REMOTE CONTROL

RGB

12 V SYSTEM

- RGB is the abbreviation for red, green and blue. With the principle of additive color mixing, almost any color combination can be created from the 3 primary colors.
- A light with RGB capability has 3 different semiconductor crystals installed in one LED, each radiating one of the primary colors.
- The 3 primary colors are mixed with RGB, therefore a pure white light color is not possible.
- A control unit (the RGB color mixer), installed between the Loox driver and the lights is required to make the different color settings.
- Up to 4 RGB lights can be connected to a color mixer and up to 12 RGB lights with the use of the RGB distributor. The color mixture that is selected applies to all of the connected RGB lights.
- The RGB color mixer is controlled by a remote control, by which the color can be continuously adjusted and changed at any time.
- RGB lighting can generate attractive color displays, which can be created by the interaction between the selected light and the illuminated furniture.

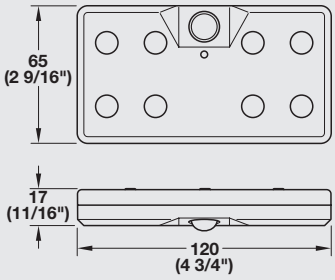
BATTERY OPERATED LIGHT WITH SENSOR

- Rectangular, rechargeable, with motion detector and twilight switch – Distance 2 m (78 3/4") / 120°
- Great for use inside cabinets or closets
- No power cord allows for ease in positioning
- With integrated motion detector (120° detection range up to 2 m (78 3/4") and 30 second delay time)
- Energy saver cuts off light after 30 seconds of no motion
- Lithium battery for long charge life
- Two operating modes: Motion: via motion detector
  Auto: motion detector active with ambient light of 5 lx
- Operating time: 8 hours
- Charging time: 3 to 4 hours

Note
lx = lux.



Note
The lighting device can be recharged using the included micro-USB cable.

Item No.	833.87.021
SRP	**$40.00**
Light Color (K)	4000 (cool white)
L x W x H	120 x 65 x 17 mm (4 3/4" x 2 9/16" x 11/16")

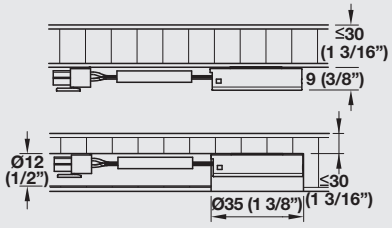
This completely invisible operating solution opens up new possibilities in continuously adjustable light control.

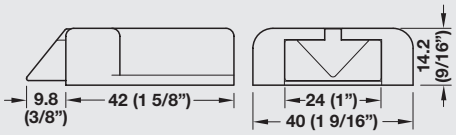


- > Works by touch
- > Concealed installation in wood, glass or stone (not suitable for metal materials) at a maximum depth of 30 mm (1 3/16")
- > For screw recess mounting (drill hole Ø 35 mm (1 3/8")
- > Please order lead for modular switch to Loox driver separately, below

Universal Door Contact Switch

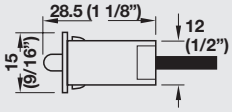
Item No.	**833.89.143**
SRP	**$16.00**
L x W x H	51.8 x 40 x 14.2 mm (2 1/16" x 1 9/16" x 9/16")
Degree of protection	IP20
Material/Finish	Plastic, black

The universal door contact switch is suitable for hinged or single-panel sliding doors.



- > Please order lead for modular switch to Loox driver separately, below

Door Contact Switch



Item No.	**833.89.059**
SRP	**$12.00**
Drill hole Ø x Length	12 mm (1/2")
Length	28.5 mm (1 1/8")
Degree of protection	IP20
Material/Finish	Plastic, black
Supplied with	2 m (78 3/4") lead

Lead for modular switches

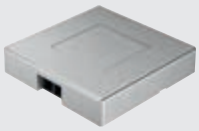
Item No.	**833.89.140**	**833.89.141**	**833.89.142**
SRP	**$6.00**	**$7.00**	**$8.00**
Length	500 mm (19 11/16")	1000 mm (39 3/8")	2000 mm (78 3/4")
Degree of protection	IP20		
Material/Finish	Plastic, black		

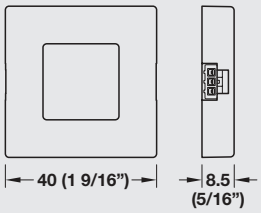
ACCESSORIES

MODULAR SWITCHES

Sensor Switch – touchless, soft on/off switching

TOUCH-FREE



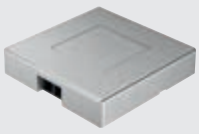


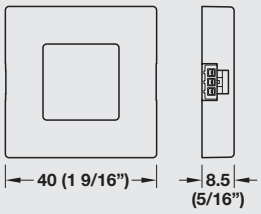
Item No.	833.89.136
SRP	$32.00
L x W x H	40 x 40 x 8.5 (1 9/16" x 1 9/16" x 5/16")
Power consumption	≤0.3 W
Power rating	90 W
Degree of Protection	IP20
Sensor range	0 – 80 (0 – 3 1/8")
Material/Finish	Plastic, silver colored
Supplied with	Mounting material

> For mounting under cabinet or shelf

Note
On/off state is stored without the need for power supply (memory function).
Lead with snap-in connector for modular switches, please order separately, see page 114.

Door Sensor Switch – soft on/off switching





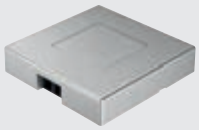
Item No.	833.89.137
SRP	$32.00
L x W x H	40 x 40 x 8.5 (1 9/16" x 1 9/16" x 5/16")
Power consumption	≤0.3 W
Power rating	90 W
Degree of Protection	IP20
Sensor range	0 – 100 (0 – 4")
Material/Finish	Plastic, silver colored
Supplied with	Mounting material

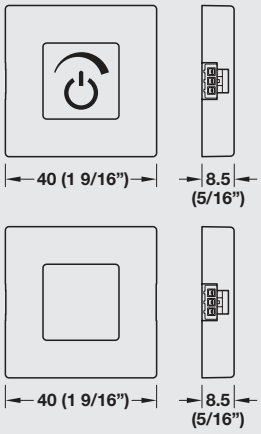
> For mounting under cabinet or shelf

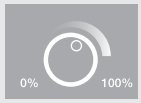
Note
Lead with snap-in connector for modular switches, please order separately, see page 114.

Dimmer – soft on/off switching

TOUCH/
TOUCH-FREE







Version	Touch	Touch-free
Item No.	833.89.134	833.89.135
SRP	$32.00	$32.00

Application	For switch Ø 12 mm (1/2")	

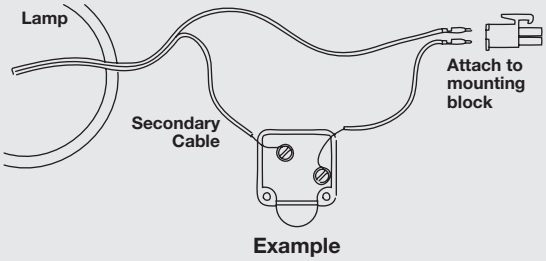
Micro Mini Switch



Example

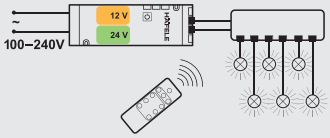
Item No.	823.28.381	823.28.382
SRP	$15.00	$15.00
Material/Finish	Plastic, black	Plastic, white

> For use behind cabinet doors
> When door is open, the light is on
> Connection is made by manually splicing one light wire into the switch

ACCESSORIES

REMOTES

Premium 6-channel Remote Receiver



Item No.	833.73.741	833.77.785
SRP	**$70.00**	**$70.00**
System	12 V	24 V
Wattage (W)	60	120
Max. wattage per slot (W)	30	60
Number of slots	6 slots for lights, power supply from driver via 2 leads	
Material/Finish	Plastic, black	

- White LED lights can be remote controlled with this system
- Remote system requires at least 1 remote and 6-channel receiver to control lights
- Three lighting scenes can be stored
- Remote switches can be added that are compatible with both the 12 V and the 24 V system
- Max. 10 remote receivers can be combined
- Light state and scene stored in memory and recalled upon start up

Note
Not suitable for multi-white or RGB lights.

Premium 6-channel Remote

Item No.	833.89.121
SRP	**$40.00**
Application	12 V and 24 system
Material/Finish	Plastic, black
Supplied with	Replaceable CR2032 lithium battery

- For controlling Loox 6-channel remote receivers for white LEDs
- Soft on/off with dimming function for 6 channels
- 3 lighting scenes can be stored
- Max. 10 remote receivers can be controlled within a radius of 15 m (49’)

Remote Switch 12 V/24 V, recess mounted

Item No.	833.89.122
SRP	**$40.00**
Drill hole Ø x Height	40 x 14.4 mm (1 5/8” x 9/16”)
Material/Finish	Plastic, silver colored
Supplied with	Replaceable CR2032 lithium battery

- For controlling all channels or one channel of Loox remote receiver for white LEDs
- Soft on/off and dimming
- Max. 10 remote receivers can be controlled within a radius of 15 m (49’)

Housing for surface mounting, round for screw mounting
- Item No. 833.89.123
  SRP $4.30

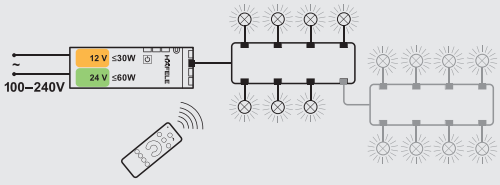
Coin Battery, Lithium-ion, CR2032 - for remotes

Item No.	002.99.032
SRP	**$4.30**

ACCESSORIES

MULTI-WHITE CONTROL

Multi-White Control 12 V/24 V



Item No.	833.73.750	833.77.787
SRP	**$60.00**	**$60.00**
System	12 V	24 V
Wattage	30	60
Power consumption (W)	0.3	0.6
Material/Finish	Plastic, silver colored	

> Radio frequency 2.4 GHz

Remote for Multi-White Control 12 V/24 V

Item No.	833.77.786
SRP	**$40.00**
Drill hole Ø x Height	40 x 14.4 (1 5/8” x 9/16”)
Material/Finish	Plastic, black
Supplied with	Replaceable CR 2032 button cell lithium battery

> Exclusively for controlling multi-white lights
> Color control, dimming (with memory function), storage of 3 lighting scenes
> Max. 10 multi-white mixers can be controlled with 1–10 remote controls within a radius of 15 m (49’)

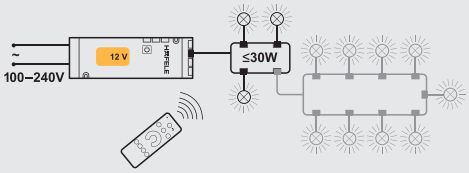
8-way distributor, for multi-white lights
Plastic, white
> Item No. 833.77.721
SRP $12.00

> Coin battery see page 117

ACCESSORIES

RGB CONTROL

RGB Color Mixer 12 V, with 4-way distributor RGB



Item No.	833.74.802
SRP	**$60.00**
Wattage	30
Power consumption (W)	0.3
Material/Finish	Plastic, white

> Radio frequency 2.4 GHz

Remote for RGB 12 V

Item No.	833.74.708
SRP	**$40.00**
Drill hole Ø x Height	40 x 14.4 (1 5/8" x 9/16")
Material/Finish	Plastic, black
Supplied with	Replaceable CR 2032 button cell lithium battery

> Exclusively for controlling RGB lights
> Color control, color change, dimming (with memory function), storage of 3 lighting scenes
> Max. 10 color mixers can be controlled with 1–10 remote controls within a radius of 15 m (49')

8-way distributor, for RGB lights
Plastic, white
> Item No. 833.74.741
SRP $6.00

> Coin battery see page 117

HÄFELE CONNECT

BLE BOX

- The BLE box (Bluetooth low energy technology – ideal protocol for wireless light control) makes it possible to control furniture lighting and electrically operated fittings using the Häfele Connect App
- A 12 V or 24 V driver supplies power to the BLE box via 2 leads
- A single BLE box or an entire network of BLE boxes is controlled with a Smartphone or tablet
- The App controls the on/off status, brightness (0-100%) and the color temperature (multi-white lights) and the light color (RGB lights)
- All parameters can be saved as scenes and retrieved at any time
- Time-controlled alteration of brightness, color temperature, light color

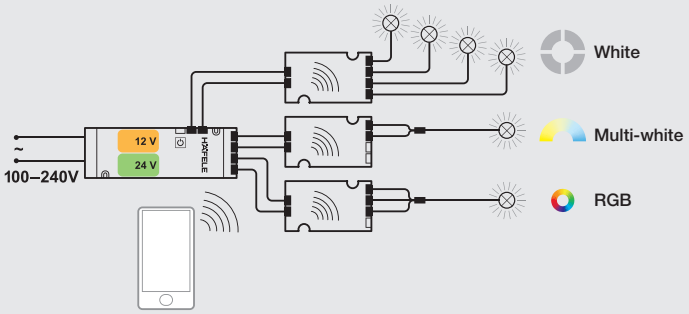
Note
The Häfele Connect App is free for Apple IOS® and Android™

Versions:
- 4 channel – provides on/off switching and dimming of lights (0-100%); order the BLE adapter separately for operating multi-white or RGB lights, refer to next page
- Multi-white – provides on/off switching and color temperature adjustment for multi-white lights
- RGB - provides on/off switching and color temperature adjustment for RGB lights

Item No.	850.00.005	850.00.006	850.00.015	850.00.016	850.00.017	850.00.018
SRP	**$100.00**	**$100.00**	**$110.00**	**$110.00**	**$110.00**	**$110.00**
Output current:	2.5 A per output (max. 30 W with 12 V, max. 60 W with 24 V; sum total of all outputs (max. 60 W with 12 V, max. 90 W with 24 V)					
Version	4 channel		Multi-white		RGB	
	12 V	24 V	12 V	24V	12 V	24 V
Number of connections	4	4	1	1	1	1
L x W x H:	100 x 57 x 17 (4” x 2 1/4” x 11/16”)					
Standby power consumption	<0.5 W	<0.6 W	<0.5 W	<0.6 W	<0.5 W	<0.6 W
Supplied with	300 mm (11 13/16”) lead		300 mm (11 13/16”) lead multi-white adapter		300 mm (11 13/16”) lead RGB adapter	

Note
The distance between the Smartphone or tablet to the nearest BLE box is 10 m (32’ 9 3/4”). Multiple BLE boxes create a network and can be placed 10 m (32’ 9 3/4”) apart. One BLE box uses 2 driver outputs.

BLE Box



- The distance between the Smartphone or tablet to the nearest BLE box is approx. 10 m (32’ 9 3/4”)
- Multiple BLE boxes create a network, and can also be placed approx. 10 m (32’ 9 3/4”) apart
- One BLE box occupies 2 outputs of the driver

BLE adapter for 4-channel BLE box

12 V
- Multi-white, Item No. 850.00.011 **SRP $ 10.00**
- RGB, Item No. 850.00.013 **SRP $10.00**

24 V
- Multi-white, Item No. 850.00.012 **SRP $10.00**

LOOX

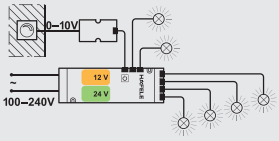
SYSTEM ACCESSORIES

Based on the plug and play driver, you can customize the system in accordance with your requirements using add-on modules. The flexible and modular components make it possible to have a wide range of applications and solutions, simplify installation or provide useful combinations of different lights and switches.

THE MOST IMPORTANT SYSTEM ACCESSORIES

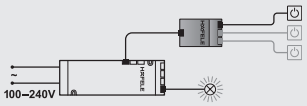
Dimmer interface 0–10 V

With the dimmer interface you can conveniently dim Loox lights in furniture together with a wall switch.



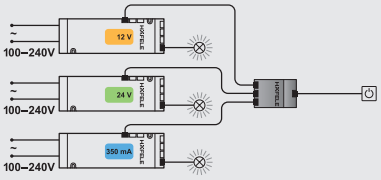
Multi switch box

1 LED driver operated by up to 3 switches. Allows the LED driver to be switched on and off from different positions.



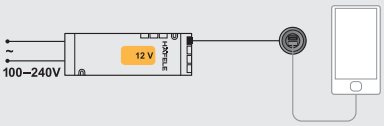
Multi driver box

Up to 3 LED drivers can be controlled with 1 switch. Several drivers and several lights in the room can be switched on and off with one switch. These can also be 3 of the same driver if you require additional power in a 12 V system.



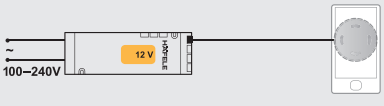
ESC 2001 USB charging station

The USB charging station is intended for direct installation in furniture. It can charge up to two tablets or smartphones simultaneously, providing more functionality in spaces.



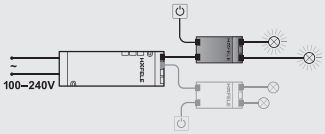
ESC 2002 wireless charging station

The wireless charging station for charging WPC-compatible smartphones, smartwatches and tablets is the perfect extension for living room and bedroom furniture.



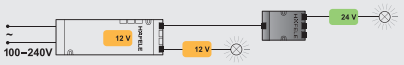
3-way distributor with switching function

The relevant lights can be operated separately and individually using the 3-way distributor with switching function connected to the output of the light.



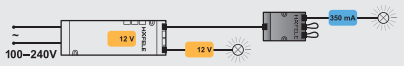
Converter 24 V to 12 V

Combine 24 V lights with 12 V lights and operate them using a single 12 V driver.



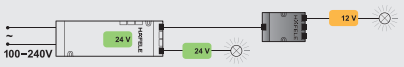
Converter 350 mA to 12 V

Combine 350 mA lights with 12 V lights and operate them using a single 12 V driver.



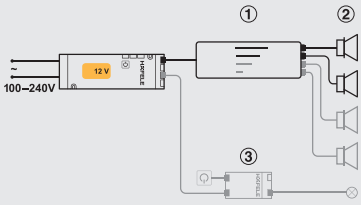
Converter 12 V to 24 V

Combine 12 V lights with 24 V lights and operate them using a single 24 V driver.



Sound system 420 E

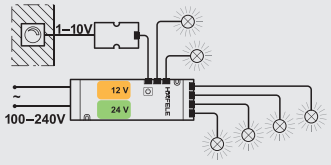
You can play music in any room with the sound system 420 E and 2-4 exciter speakers (sound transducers). Cleverly concealed in furniture or behind panels, the sound system creates a pleasing sound everywhere you want it.
① Sound system, ② Exciter speakers, ③ 3-way distributor with switching function



ACCESSORIES

SWITCH ACCESSORIES

Dimmer Interface 0-10V, Modular for 12 V and 24 V System



Item No.	833.89.144
SRP	$32.00
L x W x H	68.9 x 34.7 x 13.5 (2 11/16” x 1 3/8” x 9/16”)
Material/Finish	Plastic, black

Direct connection to a normal household dimmer with a 0–10 V control output and connection via a lead for modular switches to the switch input of a Loox driver 12 V or 24 V.

With the dimmer interface you can conveniently also dim Loox lights in cabinetry together using a wall switch. The modular design makes installation easier.

> Please order lead for modular switch to Loox driver separately
> Cannot be combined with multi switch box

> Drivers see pages 51 and 88
> Leads see page 127

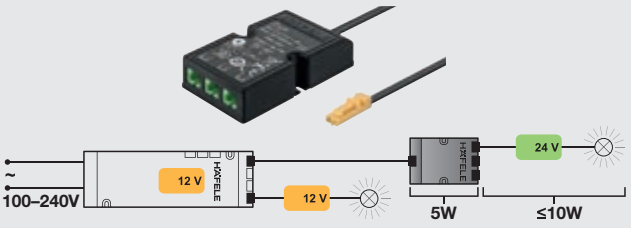
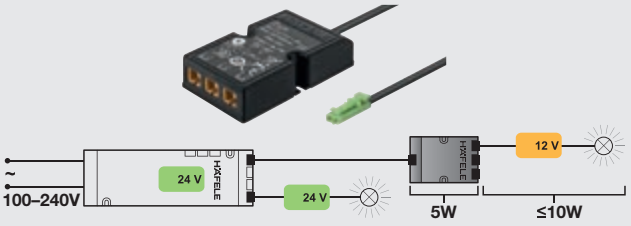
Converter 24 V to 12 V – for connecting 24 V lights to the 12 V system



Item No.	833.77.934
SRP	**$20.00**
Power consumption	15 W
Standby power consumption	0.3 W
Primary side	DC 12 V
Secondary side	DC 24 V
Number of output ports	3 connections for 24 V lights
L x W x H	61 x 34 x 14.6 (2 3/8” x 1 5/16” x 9/16”)
Supplied with	1 m (39 3/8”) lead

> Combine 24 V lights with 12 V lights and operate them using a single 12 V driver.
> Max. 10 W per converter.

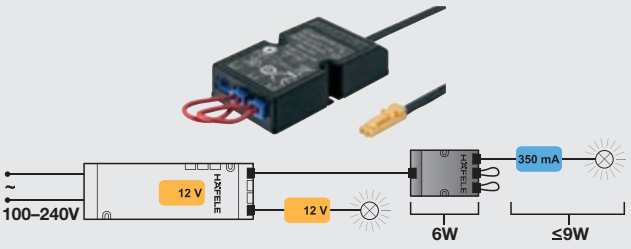
Converter 12 V to 24 V – for connecting 12 V lights to the 24 V system



Item No.	833.74.947
SRP	**$20.00**
Power consumption	15 W
Standby power consumption	0.3 W
Primary side	DC 24 V
Secondary side	DC 12 V
Number of output ports	3 connections for 12 V lights
L x W x H	61 x 34 x 14.6 (2 3/8” x 1 5/16” x 9/16”)
Supplied with	1 m (39 3/8”) lead

> Max. 10 W per converter.

Converter 350 mA to 12 V – for connecting 350 mA lights to the 12 V system



Item No.	833.80.912
SRP	**$11.00**
Power consumption	3 W
Standby power consumption	0.3 W
Primary side	DC 12 V
Secondary side	DC 350 mA (min. 1 W, max. 9 W)
Number of output ports	3 connections for 12 V lights
L x W x H	61 x 34 x 14.6 (2 3/8” x 1 5/16” x 9/16”)
Supplied with	1 m (39 3/8”) lead, 2 pcs. bridge connectors

> Max. 9 W per converter.

Replacement Bridge Connector

Supplied with	24 V male plug and clip	

For connecting additional lights to one driver.

- > Cable assemblies designed to be routed behind the drywall
- > Pull cables around windows and doors
- > Route power from another room into a kitchen or closet
- > Each cable is supplied with Loox plug & play components

In-Wall Wiring Accessories

Cable spec:

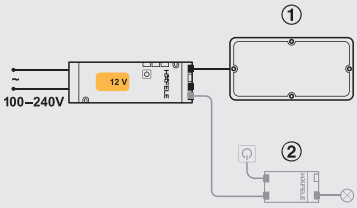
- > Wire gauge: 20AWG
- > Wire type: CL3R
- > Construction: 2-conductor, stranded copper
- > Rating: Class 2, double insulated

Meets the following codes for wire and cable locations

- > NEC article 411 Lighting systems operating at 30 V or less attached to Class 2 power
- > NEC article 411.5 Specific Location Requirements
- > NEC article 725.135 Installation of Class 2 cable

ACCESSORIES

SOUND SYSTEM 105



Item No.	822.65.001
SRP	**$150.00**
L x W x H	140 x 66 x 25 (5 1/2” x 2 9/16” x 1”)
Wattage	Amplifier power 5 W
Power consumption	Operation: 7 W, Standby: <0.3 W
Material/Finish	Plastic, black
Supplied with	2 m (78 3/4”) lead

- > With integrated exciter speaker (sound transducer)
- > Reception range: max 10 m (32’ 9 3/4”)
- > Screw mounted

Note
Consider the power consumption of 7 W when selecting a driver.

> Driver see page 51

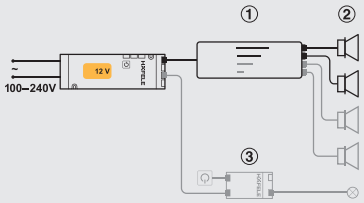
ACCESSORIES

SOUND SYSTEM 420 E WITH SPEAKERS



① Sound system
② Exciter speakers
③ 3-way distributor with switching function

Item No.	822.65.034
SRP	**$230.00**
L x W x H	140 x 45 x 15 (5 1/2” x 1 3/4” x 9/16”)
Wattage	Amplifier power 20 W
Power consumption	Operation with 2 speakers: max. 22 W, Operation with 4 speakers: max 37 W
Material/Finish	Plastic, black
Supplied with	2 m (78 3/4”) lead, 4 connections and 2 exciter speakers

Note
Expansion to 4 speakers is possible. Multi-room control for separating different users in adjacent rooms is available upon request.

> Driver see page 51

Individual Speaker, optional
> For installation in furniture, tables, counters, mirrors, walls and ceilings
> Can be installed on glass and mirrored glass (3-6 mm (1/8” – 1/4”), acrylic glass (3 mm (1/8”), chipboard (10-20 mm (3/8” – 3/4”) and mineral composite boards
> Screw or glue mounted
> Output: rated/music capacity 4/15 W
Ø x H: 65 x 22 mm (2 9/16” x 7/8”)
> Item No. 822.65.002 **SRP $50.00**
Supplied with 2 m (78 3/4”) lead

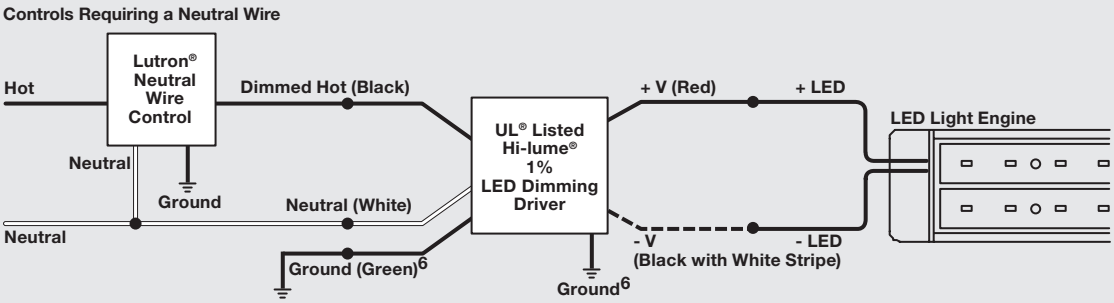
DIMMING LED DRIVER

0 100%

12 V Driver

Item No.	833.02.961
SRP	**$264.00**
Wattage	40
Input voltage	110 - 120 VAC
Output Voltage	12 VDC
W x H x D	124 x 100 x 68 (4 7/8” x 4” x 2 5/8”)
Supplied with	Driver, double gang box, wire nuts, instructions



- Control multiple LED light bars, LED strip lights and pucks up to 40 W
- 10 W minimum load
- Remote mount driver up to 40 ft. away from LED source for 12 V option
- Provided on a junction box for easy installation and wire termination
- Dimming to 1% with smooth, continuous, flicker-free performance
- Class 2 protection device
- Arrives ready to install
- Operate between 32 °F (0 °C) and 104 °F (40 °C).
- 0% to 90% humidity, non-condensing
- Hi-lume 1% LED dimming drivers offer a filtered, regulated power source that works well with LED solid state lights
- 3 wire eco-systems driver solutions are available upon request

Note

For installation by a qualified electrician in accordance with all local and national electrical codes. For indoor use and copper conductors only. Check to see that the driver type and rating are suitable for the application. **Compatible with CL Dimmers and other Lutron Dimmers and Systems.** DO NOT install if product has any visible damage. If moisture or condensation is evident, allow the product to dry completely before installation.

HARDWIRED DRIVER

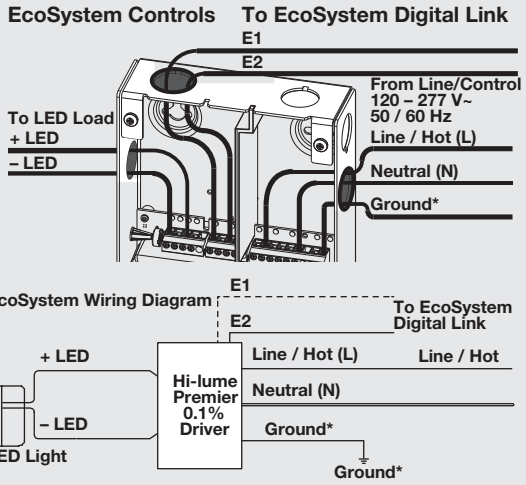
Output voltage	12 VDC, 2-40 W	24 VDC, 2-96 W
Input voltage	120-277 VAC, 50-60 Hz, 1A	120-277 VAC, 50-60 Hz
Dimming	100%-1%	100%-0.1%
Material/Finish	Steel, white	
Supplied with	Wire connection, mounting hardware, instructions	



- Control methods: Ecosystem smart digital control, 3-wire control
- Soft-on, fade-to-black dimming technology (Ecosystem control only) Rated lifetime: 50,000 hours at 40° C (104° F) ambient temperature
- Compliance: UL Listed for United States and Canada, NOM certified, FCC part 15 for residential and commercial applications, NEMA 410, RoHS
- Control lights wirelessly from multiple locations
- Allows the freedom for multiple dimmer placements within a room
- Add cabinet light controls right alongside existing rooms controls
- Smooth, flicker-free dimming from 100% down to 1%
- Provides immunity to electrical noise that can cause flicker at low noise levels
- Integrates into a planned or existing EcoSystem® or Vive™ lighting control solution
- Control terminals protect from miswiring up to 277V
- Remote mount up to 100’ from the light source
- Non-volatile memory restores all settings after power failure
- Precision microprocessor control and integral thermal management deliver energy savings and extended product life (rated 50,000 hours)
- 100% performance tested at factory

Note

Drivers and receivers must be installed by licensed electrician and are subject to applicable national, state and local electrical codes. Use in conjunction with wireless receiver (sold separately). Controlled by wireless remote (sold separately).

- Wireless receiver see page 141
- Wireless remote see page 135

LUTRON

LED DRIVER

Wireless Receiver, required

Item No.	833.01.818
SRP	**$130.00**
Output voltage	120 VAC
Mounting	Surface/threaded
Material/Finish	Plastic, white

- Controls up to 3 Eco-system drivers
- Uses Lutron Clear Connect® RF technology
- Designed to give a linear response to changes in viewed light level
- 2 wire connection between optional sensor and control module – the wires are interchangeable to eliminate miswiring
- Programmed rapid start design ensures full rated lamp life
- Lamps turn on to any dimmed level without flashing to full brightness
- End-of-lamp-life protection circuitry ensures safe operation
- Ultra-quiet operation
- Non-volatile memory restores all ballast settings after power failure
- 100% performance tested at factory

Note

Drivers and receivers must be installed by licensed electrician and are subject to applicable national, state and local electrical codes.

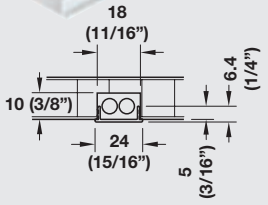
Wire management cover, recess mounted, For concealing visible cables in furniture and cabinets, Length: 2500 mm (98 3/8"), Plastic white (RAL 9010)
> Item No. 833.00.730 **SRP $ 5.00**



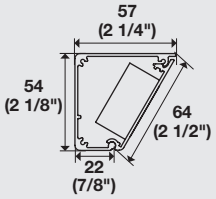
Power cord with 90° plug, Plastic, black
> 2 m (78 3/4") Item No. 833.89.017
SRP $5.00

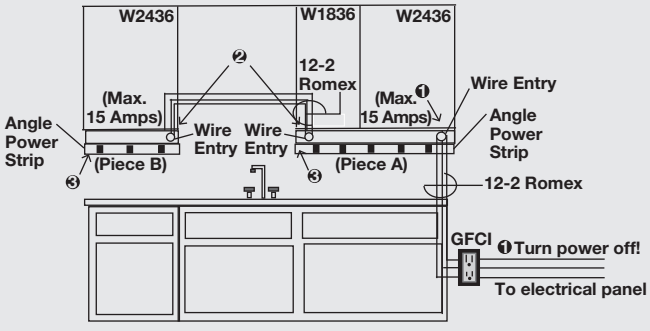
90° Plug adapter, Plastic, black
> Item No. 833.89.018 **SRP $7.00**

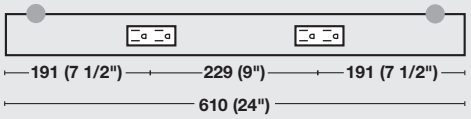
Wiring compartment / splicer
L x W x H: 51 x 25 x 16 mm
(2" x 31/32" x 5/8") Plastic
> black Item No. 824.19.396 **SRP $20.00**
> white Item No. 824.19.796 **SRP $20.00**

POWER STRIPS

Task Angle Power Strip, TR Series







= Knock-out (all knock-outs are 1 1/2" from end)

- Avoid cutting receptacles into your backsplash
- 15 amp receptacles standard
- Tamper-resistant receptacles meet 2008 NEC
- Easy installation; surface mount with screws
- Power source MUST be a 20 amp branch circuit protected by a GFCI at the panel or GFCI prior to the connection at APS
- Use knockout holes for 120 V wire entrance; use supplied Romex connectors for 120 V electrical connections
- Use supplied tool to carefully pry open for wiring (using other devices may damage the metal cover)
- Firmly insert plug straight into receptacle, applying equal pressure to both blades at the same time; gently rock plug, if needed

Note

All wiring must meet NEC® and local codes and must be installed by a licensed electrician. Field cutting voids warranty.

ACCESSORIES

DRILL BITS AND SYSTEMS

Machine Boring Bit - RH

Item No.	001.08.004	001.08.012	001.08.006	001.06.865
SRP	$46.01	$53.71	$51.34	$67.13
Material	Carbide			
Dimensions	Ø 26 x 70 (1" x 2 3/4")	Ø 28 x 70 (1 1/8" x 2 3/4")	Ø 35 x 70 (1 3/8" x 2 3/4")	Ø 40 x 57 (1 5/8" x 2 1/4")

Machine Boring Bit - with Center Spur - RH

Item No.	001.07.513	001.07.522	001.08.040	001.08.016
SRP	$139.32	$141.91	$160.37	$171.26
Material	Carbide			
Dimensions	Ø 55 x 57 (2 3/16" x 2 1/4")	Ø 58 x 57 (2 5/16" x 2 1/4")	60 x 57 x 10 (2 3/8" x 2 1/4" x 3/8")	68 x 70 x 10 (2 11/16" x 2 3/4" x 3/8")

Drilling Jig for Puck Light

Item No.	001.35.052
SRP	$838.32

Drill Bit for Puck Light, with stop

Item No.	001.35.053
SRP	$149.66
Material	M2 HSS Steel
Ø X L	3/8" x 18"
Supplied with	Hex key

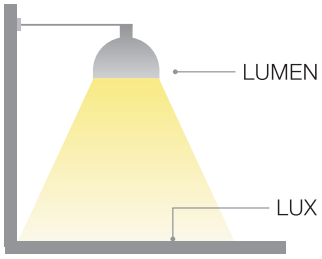
- > High grade steel material for increased drill life
- > Allows for deeper wire holes

Forstner Bit Assembly, for Puck Light

Item No.	001.35.054	001.35.055
SRP	$105.58	$105.58
Material	HSS Steel	
Ø	2 1/8"	2 1/4"
Supplied with	Adjustable depth stop, collar, hex key	

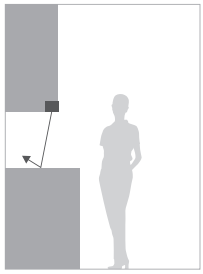
- > Superior Austrian quality
- > High grade steel material with patented wave cutting edge
- > Patented cutting edge drills 10x faster than standard bits
- > Modified low-profile brad point tip for flat bottom hole

LIGHT MEASUREMENTS



LUMEN

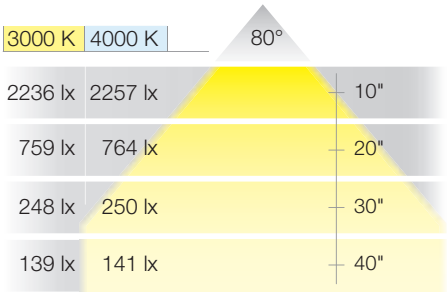
Lumen is the unit of measurement used to indicate the volume or amount of light emitted by a lamp. Lumen is measured at the lamp's source. Think of lumen as the "showerhead" that showers light down onto a surface.



REFLECTIONS

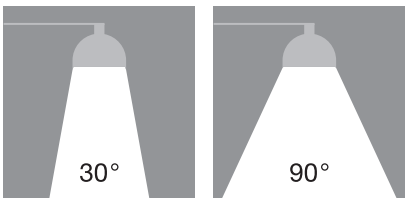
Light reacts differently to various materials, finishes, colors and tones

> It is absorbed by dark materials
> It is reflected by light materials
> Surfaces that are smooth and shiny reflect more light than rough, dull surfaces



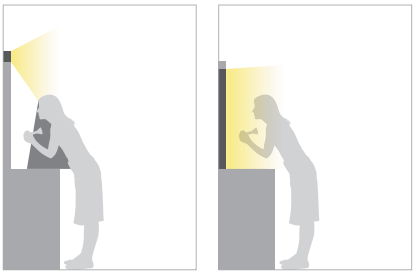
LUX

Lux is the measurement of light intensity taken at the surface being illuminated. If Lumen is the showerhead, Lux is where the water lands on the shower floor. 1 Lux is defined as 1 square meter of light emitted by a standard wax candle placed 1 meter from an illuminated surface.



BEAM ANGLE

The beam angle is the measurement of the cone of light that is emitted from a lamp. It is measured from its furthest edges where the light falls to 50% of the maximum intensity from the center. The center is commonly referred to as Nadir.



WORKING WITH SHINY SURFACES

> Place under cabinet lights at the front edge of the cabinet to minimize glare from high-gloss countertops and backsplashes

Shadows

> Cubbies, alcoves and other dark cavities will benefit from ribbon and puck lighting
> Use medium intensity light to avoid creating harsh shadows
> For mirrors, use vertical recessed lighting to create a functional wash of light that avoids creating heavy shadows

COLOR RENDERING INDEX (CRI)

An LED's CRI number refers to its ability to accurately render colors in the way they are meant to be seen. A higher number indicates a better quality of light that more closely resembles natural sunlight. Higher CRI ratings reflect a dramatic improvement in the quality of LED lighting. Varying the CRI can affect how objects, spaces and people appear to the eye. Above is an visual approximation of how different CRI ratings may render color:

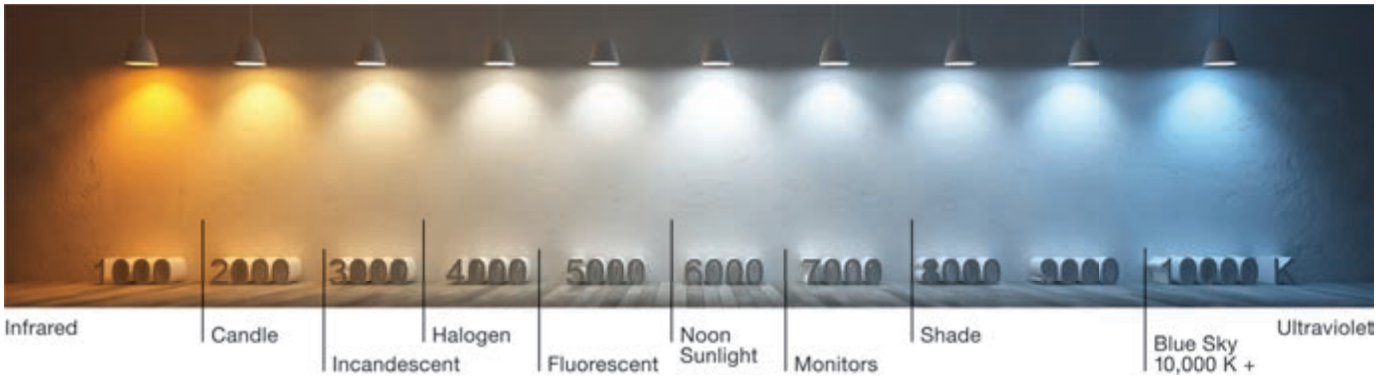
> A high CRI offers the most realistic looking lighting
> Lighting in bathrooms or around mirrors requires more realistic facial tones, and calls for lighting with a high CRI
> A high or low CRI will produce a significant color difference on surrounding surfaces

COLOR TEMPERATURE

Light color is used to establish character or mood in an environment. The color the light produces is called the color temperature and is expressed in degrees Kelvin (K).

> The lower the Kelvin rating, the warmer the light color, light with more red tones is at a lower color temperature, and is described as warm

> The higher the Kelvin rating, the cooler the light color, pure white light is at a higher color temperature, and is described as cool



Color Temperature	Color	Attributes	Applications
2700 K	Warm White	Comfortable, cozy, soft, relaxing-compare to an incandescent light bulb	Bedrooms, living rooms, dining rooms, restaurants
3000 K	Bright Warm White	Inconspicuous, homey, casual, slightly brighter than Warm White, comparable to a halogen	Living rooms, restaurants, hotels, outdoor lighting
4000 K	Cool White	Bright, friendly, inviting, natural	Typically for kitchens, bathrooms and home offices
5000 K	Cool White	Bright and airy	Product displays and graphics
6500 K	Daylight White	Close to daylight, good color rendering, higher proportion of blue, neutral	Retail and jewelry stores

RULE OF THUMB FOR CHOOSING COLOR TEMPERATURE

Choose temperature to complement materials. A warm color temperature works well with wood finishes, while cool color temperatures are best for white, metallic, glazed or painted finishes. Color temperature can highlight and enhance a cabinet's finish by adding depth and brilliance. The wrong color temperature can flatten or distort the finish or color.

COMMIT TO A SINGLE COLOR TEMPERATURE WITHIN A ROOM

Choose either warm or cool colors; mixing lighting colors will create an incongruous look. For example, if you choose cool light for a tall cabinet, then choose cool color lights in drawers and base cabinets as well.

Lighting Types	White	Multi-White	RGB
Task Light	***	*

Decorative Light	***	***	***

* Good ** Better *** Best

INTERIORS LIGHTING RECOMMENDATIONS

Area	Lux	Color Temperature
Kitchen, dining area	300-500	2700-4000 K
Retail, jewelry stores	300-500	4000-6500 K
Bedroom, living room	200-300	2700-4000 K
Bathroom	200-300	3000-4000 K
Storage	100	4000 – 5000 K
Orientation lighting, hallway, closet	10-50	2700-4000 K

QUICK SELECT

Luminosity	Definition	Light Color	Kelvin
Task	500 lux/500 mm	Warm White	<3400 K
Accent/Functional	151 lux-499 lux/500 mm	Cool White	3400-5900 K
Orientation (Night Light)	<150 lux/500 mm	Daylight	>5900 K
		Multi-White	2700-6500 K

FAQ

QUESTIONS AND ANSWERS

GLOSSARY

LED

A light-emitting diode (LED) is a semi-conductor element that emits light when electricity passes through it. This semi-conductor element consists of a crystal that is attached to a metal holder, and both are encapsulated in protective plastic. LEDs are mostly based on inorganic, non-carbon materials.

OLED

Organic light-emitting diodes (OLEDs) are based upon organic (carbonic) materials. OLEDs are manufactured in thin layers and therefore provide a diffuse light source. The OLED technology is becoming more frequently used in display applications (mobile phones and PDA screens).

Service life of an LED

Up to 30,000 hours.

Infrared radiation from LEDs

LEDs do not emit infrared radiation like incandescent bulbs do.

Heat generation of LEDs

All light sources produce heat, even LEDs. However, they do not become very hot, especially if the LEDs and lights are fitted with "heat sinks", which help reduce heat.

Test of service life in accordance with the LM-80 standard?

Häfele tests Loox LED flexible strip lights in accordance with the LM-80 standard. LM-80 is a standardized testing method, which allows products to bear the EPA's (Environmental Protection Agency) Energy Star. The test is a manufacturer-independent comparison of LEDs. During the test the luminous flux (Lumen maintenance) and the service life of an LED are tested at three different temperatures (113, 131, and 149 °F) for 6,000 hours.

LEDs and food

Since LEDs do not emit UV radiation, they are a better option for supermarkets, restaurants and kitchen lighting. UV radiation reduces the nutrient content in foods, while all other light sources, including natural and artificial emit UV radiation. In addition LEDs do not emit heat which keeps foods fresher longer.

Lead in Loox products

Loox products by Häfele are lead-free and adhere to the RoHS guidelines.

TECHNICAL QUESTIONS ABOUT LOOX

Can the 12 V/24 V lights be dimmed at the primary side?

Yes, this is possible with the dimmable magnetic drivers or electronic low voltage drivers controlled by wall dimmers.

What has a major effect on the service life of drivers and LEDs?

An ambient temperature and/or input voltage that is too high.

How long can the lead of an LED light / LED flexible strip light be?

6 meters (20'), with a longer lead the resistance drops and the specified light intensity cannot be guaranteed.

What is the service life of the drivers?

Approximately 30,000 hours at an ambient temperature of 113 °F.

Can the multi switch box, the multi driver box and the 3-way distributor with switching function be connected in series multiple times?

No, because the signals would not be transmitted properly.

With what output tolerance should drivers and LED lights be calculated?

±10 percent

What binning (color deviation) do Loox LED lights have?

Avg. ±150 Kelvin - single bin, 3 step

Can 12 V and 350 mA lights be used together?

Yes, please use our corresponding converter. (see page 126)

FAQ

QUESTIONS AND ANSWERS

TECHNICAL QUESTIONS ABOUT LOOX

Which ambient variables can lead to problems when using the door sensor switch?

High-gloss front panels and sliding doors. For a better solution, please use a motion detector.

Is it possible to control multiple color mixers with a single remote control?

Yes, different color mixers can be managed on a single remote control.

Is the dimmer setting saved if the power fails?

The dimmer setting is saved for RGB/multi-white mixers, the touch free dimmer switch and the multi-channel remote receiver for white lights. The setting is not saved for the Loox touch dimmer.

For how many Amps are the normal commercial LED plug systems and AWG-22 leads suitable?

2.5 Amps

What is the maximum Wattage that I can connect to an AWG-20 lead and plug?

With 12 V systems this is 12 V x 3.5 A = 42 W. With 24 V systems this is 24 V x 3.5 A = 84 W

What is AWG 20?

AWG stands for American Wire Gauge. It is the coding for wire diameters in electrical leads that are mainly used in North America. This identifies the cross-section of wires in electrical leads that consist of strands of wire.

Can your lights be operated using multiple switches?

Yes, please use the multi switch box to do this. Up to three switches can be connected to the multi switch box. The dimmer does not work with the multi switch box. (see page 124)

What is the difference between the different LED flexible strip lights?

LED 2012, 2030, 3030 and 3031 flexible strip lights are encased in silicone, so profiles are not required for installation. These LED flexible strip lights can be directly installed into a groove or attached to a surface. LED 2029, 2037, 2016, 2041, 2042, 3032, 3015, 3028 flexible strip lights do not have silicone and it is advisable to use aluminum profiles for installation and heat management.

What influence does the type of glass edge have on the lighting effect that is generated?

The lighting effect varies depending on the type of glass shelf. Glass edge with satin finish = even light line (diffused glow) Clear glass edge = point light (hot spots)

Can I simply cut LED flexible strip lights to length?

Yes, LED flexible strip lights can be shortened at the mark with the scissor symbol. Please note the following differences when doing this: LED 2012 flexible strip lights can be shortened but not re-attached. LED 2029, 2030, 2037, 3015, 3028, 3030, 3031, 3032 flexible strip lights can be shortened or extended as much as required, since the connection between the strips and the connection to the driver is made using clip connectors. Example of LED 3015 flexible strip lights: Cut off, fit clip connector and press on – finished.

Can be shortened

Installation: Self-adhesive

Lead with clip connector

Why do the lights have to be plugged in first before connecting the primary plug?

If the driver is connected to the power first, electrical power is output at the secondary side, which leads to overvoltage which damages the lights if they are connected. This is especially true with the 350 mA system.

Can Loox lights be used in vehicles, for example?

Yes, but an upstream voltage stabilizer must always be installed, since voltage fluctuations occur in on-board power supplies and voltage peaks (even slight overvoltage). This can reduce the service life of the lights considerably or cause damage.

How can I compare the output of an LED light with a halogen light?

Use the light cone to compare the values at 500 mm (19 11/16”). A 20 W halogen light features approx. 600 lx at 500 mm.

FAQ

QUESTIONS AND ANSWERS

TROUBLESHOOTING

Why does the light flash at regular intervals when it is switched off?

This is caused by leakage current in the electrical installation which is charging the capacitor in the driver until it briefly gives off the power at regular intervals to discharge itself resulting in brief flashing of the light. Solution: Check the entire installation.

Why does my LED light flash?

Flashing is a sign of underloading or overloading. Use a driver with higher power or reduce the consumption.

What may be the cause if an RGB LED flexible strip light is only displaying individual colors?

The clip connector has been connected incorrectly or the strip has been connected to the wrong end or to the driver.

Why is the door sensor switch not operating correctly?

When sliding doors are being used, the door sensor switch cannot record the rapid movement and the movement of the door properly. Dark surfaces (e.g. jet black) have poor reflection, therefore the optical sensor may fail to detect the door panel. Solution: Use motion detectors.

What are the differences between the output of the different Loox LED flexible strip lights?

	LED 2029	LED 2030	LED 2037	LED 2041	LED 2042	LED 2016
Wattage W/ft.	3/ft.	1.5/ft.	1.2/ft.	3/ft.	1.5/ft.	2.16/ft.
Number of LED/m (LED/ft.)	120 (36)	60 (18)	120 (36)	120 (36)	60 (18)	30 (9)

Technical terms	
Energy Efficiency Category	The energy efficiency category provides information about the relevant energy consumption. Lamps and lights are categorized in classes E to A++. LED lights achieve the highest classes A to A++.
Weight Energy Consumption	The weighted energy consumption shows the energy consumption in kilowatt hours in relation to 1,000 hours of use.

LED LIGHTING TECHNOLOGY

LEDs (Light Emitting Diodes) can vary the properties of the light that is generated, and generate almost the entire color spectrum. Unlike normal light bulbs and halogen lamps, LEDs generate little heat. They use less energy and have a long service life.

ADVANTAGES

Long lasting

> LED lights have an extremely long service life of up to 25 years or more than 30,000 hours.

Insensitive

> LEDs have an extremely small and robust design. This makes handling easier during furniture construction and transportation.

Low heat generation

> LED lights generate very little heat, because of their low power consumption, making LED lighting systems particularly suitable for displays.

Energy-saving

> LED lights use an impressive 90 percent less power than conventional light bulbs! This means that they can be used to incorporate modern lighting schemes in furniture, and still stay in line with the energy saving trend.

Powerful

> Modern LED lights are bright and have a saturated light color. They achieve full brightness as soon as they are switched on. LED furniture lighting produces a lasting effect at the push of a button.

Rich in variants

> LED lights are available in different colors, and can also be designed as color changing lights. This allows the light color to be coordinated with furniture contents, such as displays, in the best possible way.

THE LOOX LIGHTING TECHNOLOGY

The Loox LED technology incorporates different power systems. A system is decided on by choosing the driver or by choosing a particular light. The choice of system is an important decision, because the driver that is selected can only be combined with lights from the same system.

12 V System

An array of choices in the 12 V system

The LED lights are voltage-controlled and connected in parallel in the 12 V system. The slots on the driver can be freely allocated. 12 V lights are presently the most extensive.

24 V System

Powerful 24 V system

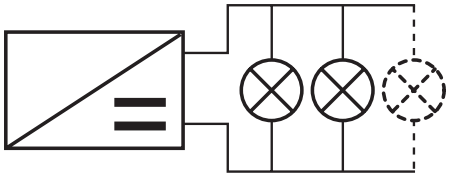
Technically speaking, the 24 V system is identical to the 12 V system, but has a considerably higher power level. 24 V lights are used when extremely bright lights are required.

350 mA System

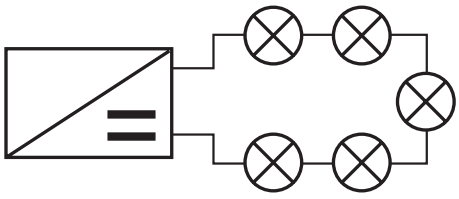
Spotlights in the 350 mA system

The LED lights in the 350 mA system are current-controlled and connected in series. This means that each slot has to be either occupied or must have a bridge. 350 mA lights provide extremely strong light output and are particularly suitable for spotlighting.

DRIVER ELECTRICAL CIRCUITS



Parallel connection for 12 V and 24 V systems

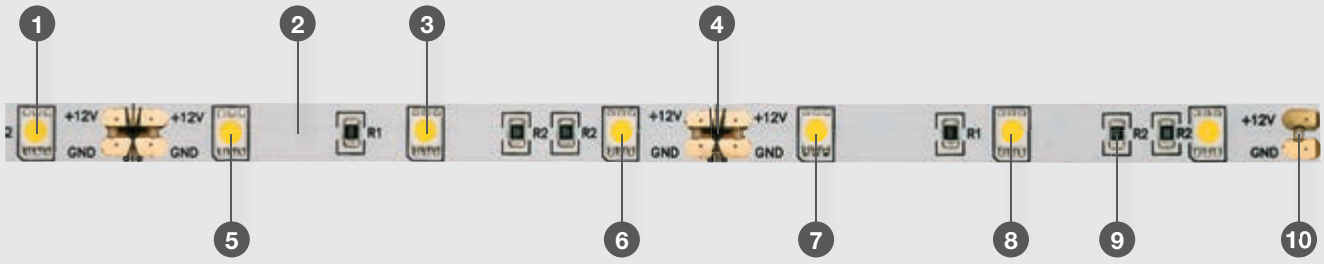


Series connection for 350 mA system

LED FLEXIBLE STRIP LIGHT

QUALITY FEATURES

What does the design of Loox LED flexible strip lights look like?



1. Very bright, high quality LED for the best light quality
2. Highly flexible LED strip light with rear 3M© adhesive tape for providing secure adhesion to practically any surface
3. Wide beam angle
4. Can be individually shortened and extended via the clip connector
5. No UV radiation
6. Service life of up to 30,000 hours – tested according to LM-80
7. Fine brightness and color temperature binning
8. The multilayer circuit board guarantees minimal loss of performance and minimal heat generation due to the high quality material components.
9. Using the maximum quality for the electronic components and the drivers provide consistently high light quality.
10. The gold-plated contacts provide a secure connection to the driver using the clip connector.

Can be individually combined with:
Profiles (see pages 103–109)
Switches (see pages 113–116)
Distributors (see page 127)

LED STRIP LIGHTS

ACCEPTABLE STRIP LIGHT LENGTHS WITH THE USE OF 3.5 A COMPONENTS

LED strip lights and LED silicone strip lights can be connected to several driver outputs.
The table shows the maximum acceptable strip light length at an individual output or at all outputs of a driver as a whole.

> Only valid if components (leads and interconnecting leads, mixers, aluminium profile switches, radio receivers, BLE box) with current carrying capacity of 3.5 A are used.
> If one of the following components with a lower current carrying capacity of 2.5 A is used, the **strip light length is reduced based on wattage below:**

Aluminium profile switches, mixers	**Current carrying capacity**
12 V system, max. 30 W	2.5 A
24 V system, max. 60 W	2.5 A
6 Channel - Premium remote receiver	
12 V system, max. 60 W (max. 30 W per slot)	2.5 A
24 V system, max. 90 W (max. 60 W per slot)	2.5 A
BLE box	
12 V system, max. 60 W (max. 30 W per slot)	2.5 A
24 V system, max. 90 W (max. 60 W per slot)	2.5 A

> If the load of the driver is ≥80%, the sum total of leads to the lights may not exceed 6 m.

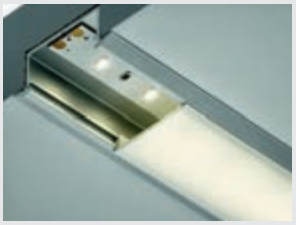
** at least 2 multi-white mixers are required

LED STRIP LIGHTS

VISIBILITY OF LED POINTS

Profile cover finishes – different light effects



Milk

Frosted

Milk cover:
The material is dyed and creates a homogeneous surface-directed light with uniform intensity.
The light appears “soft”.

Frosted cover:
The surface is frosted. The light appears “velvet-white” and creates a sophisticated, high-quality impression.
The light points are visible.

Visibility of LED points

The surface of the diffusers is decisive for the lighting effect of an LED strip light. Frosted covers only absorb a little light – the LED points remain visible.

Milk covers absorb more light. Depending on the distance between the LED strip light and a milk diffuser, homogeneous lighting can be created with certain aluminum profiles and LED strip lights from 90 LEDs/m. This is particularly pleasing when you have a direct view of the profile, or if completely homogeneous indirect lighting is required.

In order to achieve the specified life time of LED strip lights with output of ≥7 W/m, the LED strip light should only be used on a cooling strip or in an aluminum profile.

HÄFELE

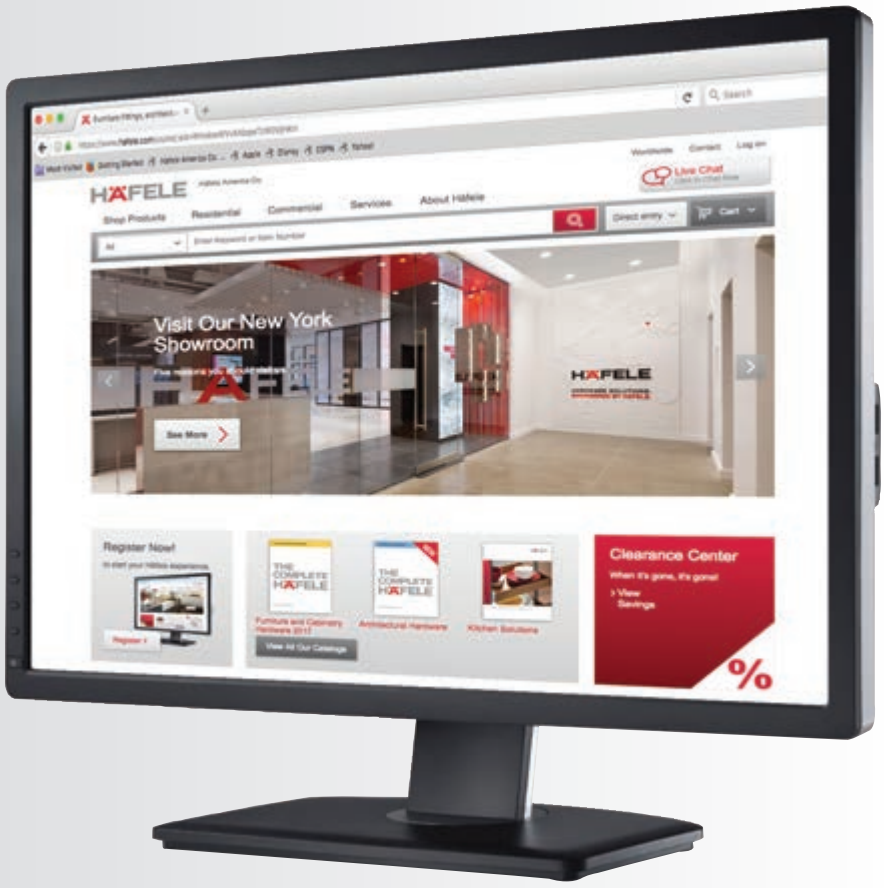
THE HÄFELE ONLINE STORE

A BETTER WAY TO DO BUSINESS WITH YOU.

YOUR ONLINE HARDWARE STORE IS THE ULTIMATE WAY TO VIEW YOUR SELECTIONS:

- Finding exactly what you want is simple. Sort by size, finish, style and many other attributes to find the perfect fit for your cabinetry or project.
- Never miss the unveiling of an essential product. With our conveniently placed products and the red “new” symbol for our latest and greatest—you won’t miss out on all the latest, trending products.
- Instant pricing and product availability information lets you make smarter business decisions.
- Customized account management gives you greater control over who uses your account—and how they use it.



LOG ON TODAY — IT’S THE COMPLETE HARDWARE SOURCE YOU’VE BEEN WAITING FOR!
